1. Source Code

```
8  import UIKit
9  import WebKit
10
11  class ViewController: UIViewController,
    UIPickerViewDelegate, UIPickerViewDataSource, WKNavigationDelegate {
12
13      let PICKER_VIEW_COLUME_COUNT = 1
14      var urlFileName = [
15          "https://www.naver.com",
16          "https://www.google.com",
17          "https://www.daum.net",
18          "https://www.youtube.com"
19      ]
20
21      // pickerView에 표기되는 도메인명 (순서대로)
22      var domainNames = [
23          "Naver",
24          "Google",
25          "Daum",
26          "Youtube"
27      ]
28
29      @IBOutlet weak var myWebView: WKWebView!
30      @IBOutlet weak var myActivityIndicatorView: UIActivityIndicatorView!
31      @IBOutlet weak var pickerView: UIPickerView!
32
33      func loadWebPage(_ url:String) {
34          let myURL = URL(string: url)
35          let myRequest = URLRequest(url: myURL!)
36          myWebView.load(myRequest)
37      }
38
39      override func viewDidLoad() {
40          super.viewDidLoad()
41          myWebView.navigationDelegate = self
42          pickerView.delegate = self
43          pickerView.dataSource = self
44
45          // 초기 웹페이지 로드
46          loadWebPage(urlFileName[0])
47      }
48
49      // pickerView DataSource
50      func numberOfComponents(in pickerView: UIPickerView) -> Int {
51          return PICKER_VIEW_COLUME_COUNT
52      }
53
54      func pickerView(_ pickerView: UIPickerView, numberOfRowsInComponent
    component: Int) -> Int {
55          return urlFileName.count
56      }
57
58      webView(_ :didFail:withError:)
```

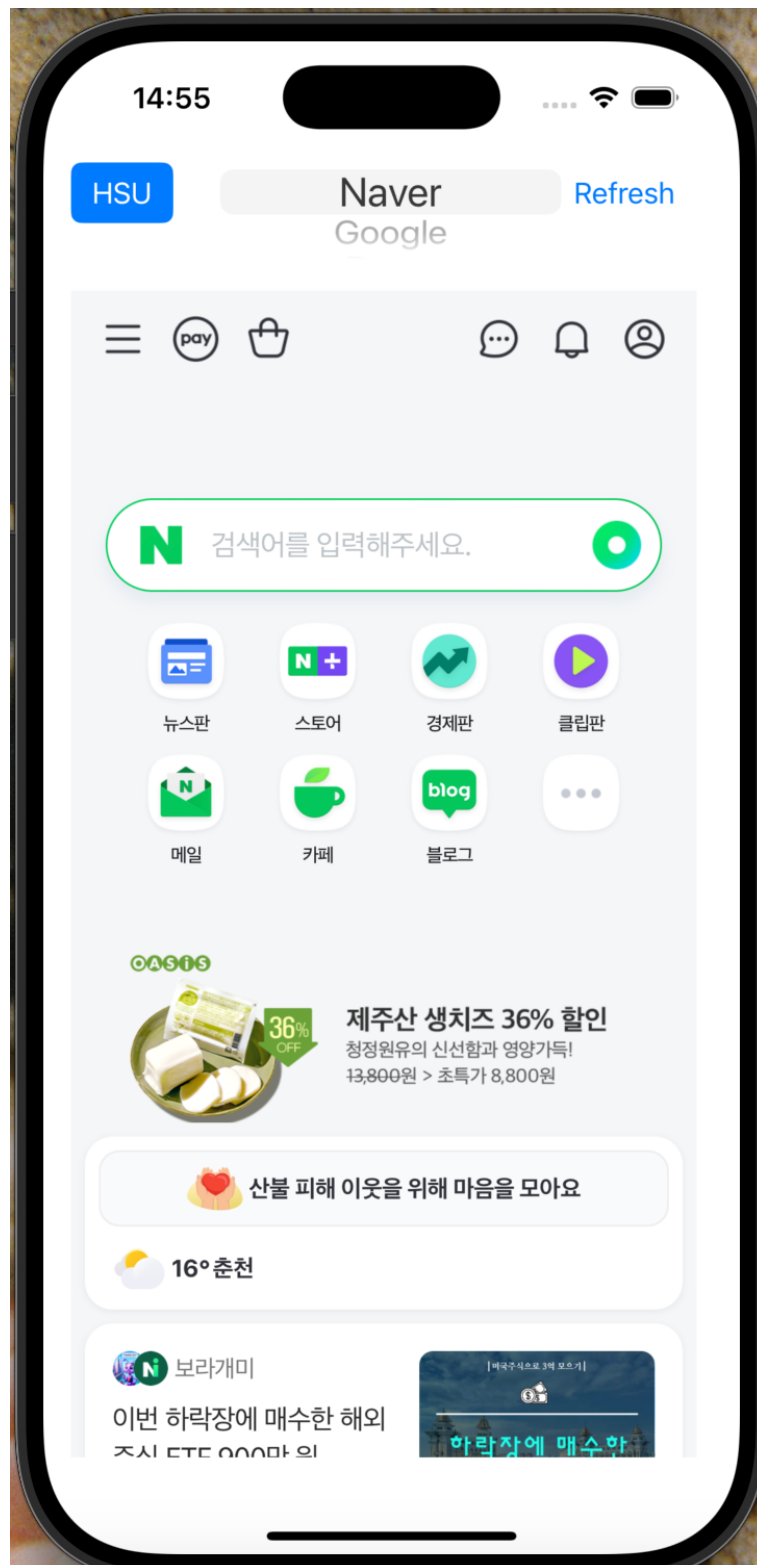

```

57
58 // UIPickerView Delegate
59 func pickerView(_ pickerView: UIPickerView, titleForRow row: Int,
60               forComponent component: Int) -> String? {
61     return domainNames[row] // 도메인명만 표시
62 }
63
64 func pickerView(_ pickerView: UIPickerView, didSelectRow row: Int,
65               inComponent component: Int) {
66     loadWebPage(urlFileName[row]) // 실제 URL로 로드
67 }
68
69 // 새로고침 기능
70 @IBAction func btnRefresh(_ sender: UIButton) {
71     myWebView.reload()
72 }
73
74 @IBAction func btnHSU(_ sender: UIButton) {
75     loadWebPage( "https://www.hansung.ac.kr" )
76 }
77
78 func webView(_ webView: WKWebView, didCommit navigation: WKNavigation!) {
79     myActivityIndicator.startAnimating( )
80     myWebView.isHidden = false
81 }
82
83 func webView(_ webView: WKWebView, didFinish navigation: WKNavigation!) {
84     myActivityIndicator.stopAnimating( )
85     myActivityIndicator.isHidden = true
86 }
87
88 func webView(_ webView: WKWebView, didFail navigation: WKNavigation!,
89               withError error: any Error) {
90     myActivityIndicator.stopAnimating( )
91     myActivityIndicator.isHidden = true
92 }
93
94 }
95
96

```

2. 실행화면

2.1 초기화면

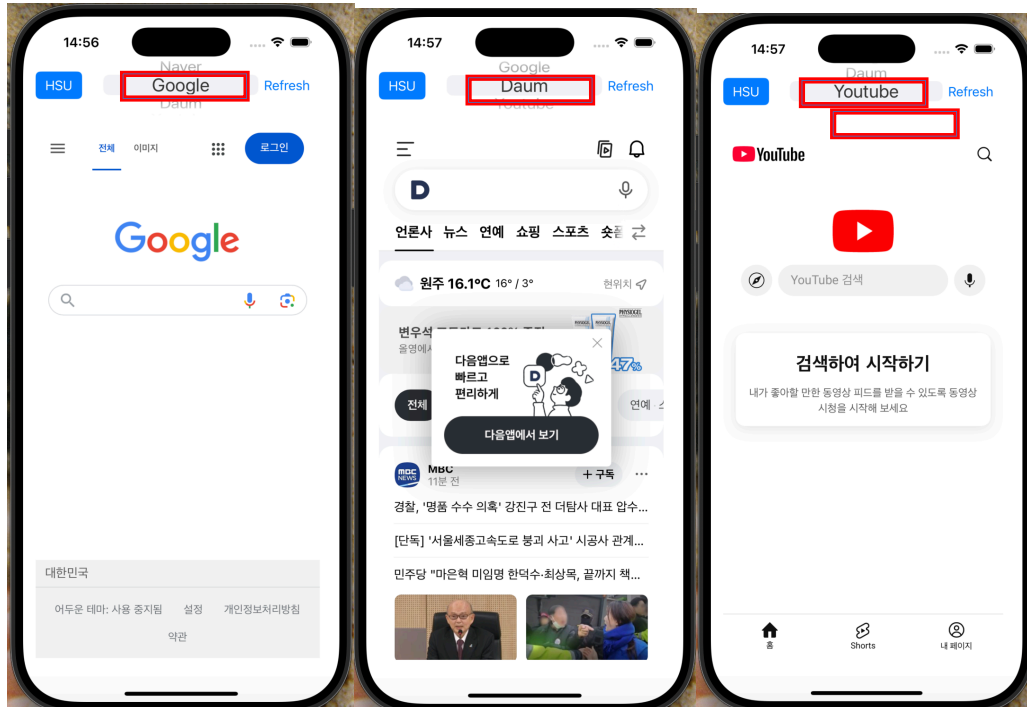

2.2 HSU 버튼 클릭

2.3 pickerView를 통해 여러 웹사이트 표시(도메인명 표시 되게 설정)

(PickerView 표기 변경 – 출처: 강의자료)

2.4 Refresh 버튼으로 새로고침 기능 – 출처: 강의자료
